SaaS Platforms
(Mobile, Web, DevOps)

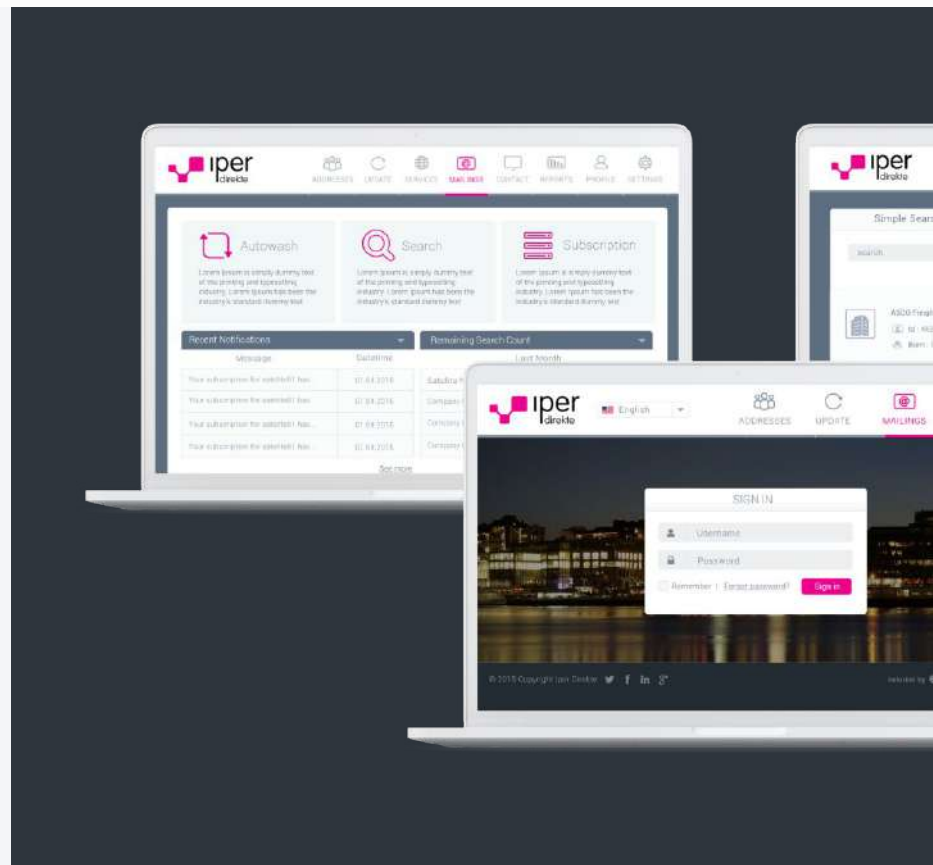

Iper

Services of the Iper web portal include data cleaning, warehousing, and a database of consumer and business contact information in Norway. Iper portal is based on RESTful API, which enables seamless integration with the client platform.

Technologies

.NET	Elasticsearch, Kibana
KnockoutJS	Pentaho Data Integration (Kettle)
MS SQL Server	Auth0
PostgreSQL	AWS

 Since 2015

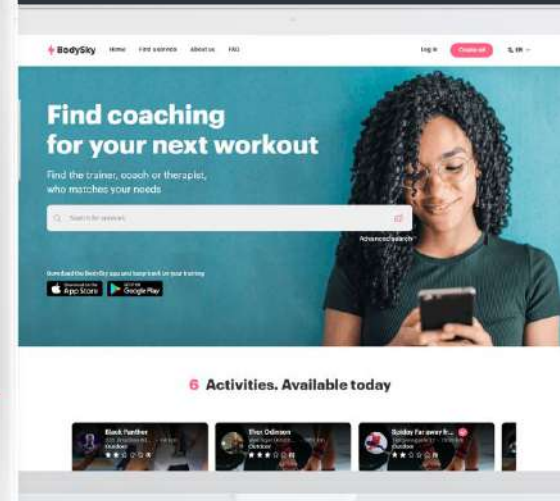

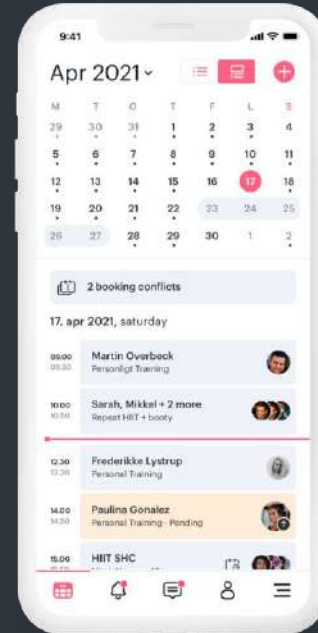

BodySky

BodySky is a platform for trainers to connect with both existing and new clients, and for clients to find the right trainer for their goals. It simplifies communication, booking, payments, and progress tracking, serving as an all-in-one administration platform for both trainers and clients.

Technologies

Spring Boot	iOS (Objective C)	MariaDB
Angular	Android	AWS
Java		

 Since 2021

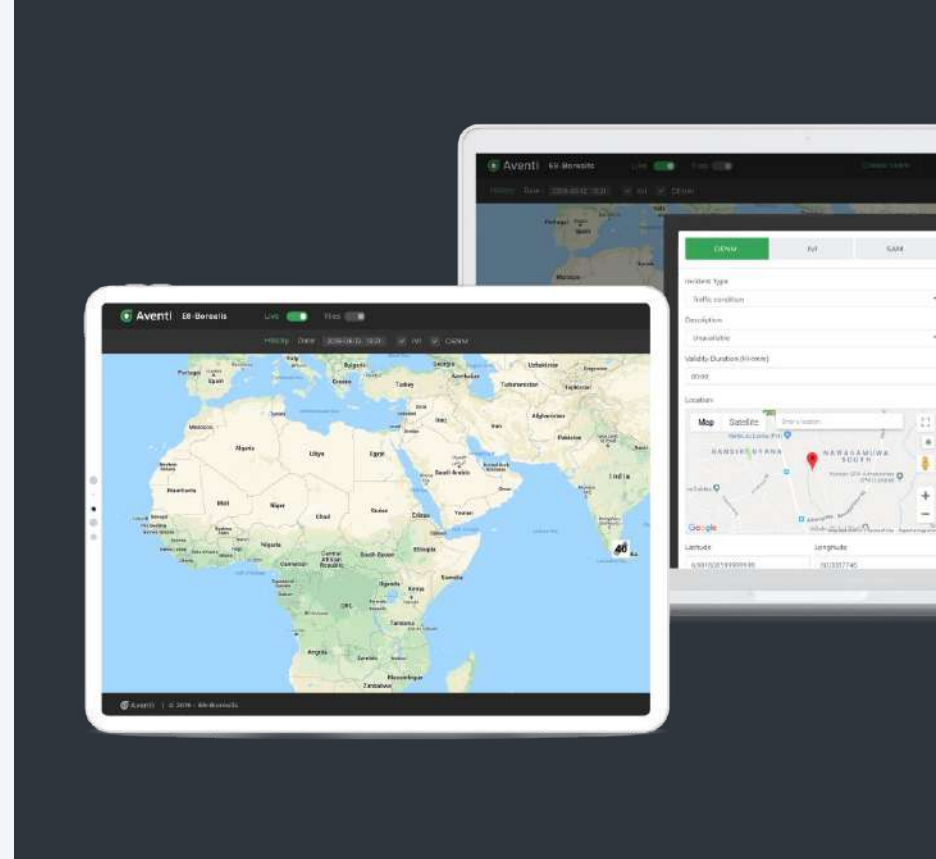

E8 Borealis

The E8-Borealis is an evaluation pilot project by Aveni Technology. This would evolve into a large nationwide traffic and road network monitoring system. E8BPP has the capability to read technical parameters from motor vehicles and share such data with other vehicles and the central server. This solution receives and triggers traffic alerts and road signs that are valuable information for road and traffic management authorities and vehicles.

Technologies

C/Linux	Java	MQTT	MongoDB
ASP.Net	Android	MySQL	

 Since 2017

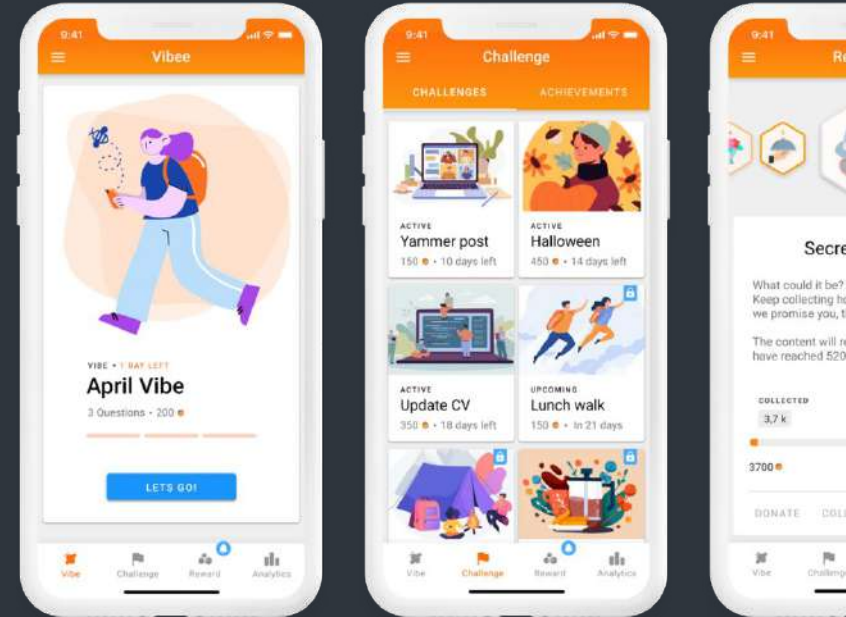

Vibee

Vibee is an employee engagement software designed to gather and present employee feedback. Vibee platform makes use of data anonymization standards to preserve the employee identity.

Technologies

Flutter	ReactJS
.NET 6	PostgreSQL
C#	Microsoft Azure

 Since 2022

YogaHive

YogaHive is a thriving hub for yoga teachers and students that operates with an efficient, affordable, and national yoga pass system. It has a comprehensive directory of places to practice yoga around Australia.
